The QCP 2000 Series Phones by Kyocera

Quick-change color for stylish communication

It's your phone—and your choice.

Put on a color faceplate to match your mood. New mood? New event? Change to a different color. Customization is what the QCP 2000 Series phones are all about. Which is why you can set them to ring differently for different kinds of calls. And even set them to vibrate when a ring just wouldn't be right.

These phones make your life easier in timesaving ways as well. They feature an address book with plenty of room for names, addresses and phone numbers. Plus, they can also help keep you safe with one-touch dialing.

The QCP 2000 Series phones have brains as well as beauty. These are Code Division Multiple Access (CDMA) digital phones. This makes checking the Web as well as your phone messages easier. Find out how your stocks are doing. See who won the big game. Keep track of the weather. Anywhere, anytime.*

A phone as an accessory. Part of your lifestyle, important to your life. We think technology can be fun as well as practical.

Kyocera Wireless Corp. is a wholly owned subsidiary of Kyocera International, Inc., which acquired QUALCOMM Incorporated's CDMA consumer wireless phone business. Kyocera Wireless Corp. incorporates QUALCOMM's CDMA technology in the development and manufacture of wireless phones and accessories for customers worldwide.
